Plumdrop, New York, NY

• Implemented effective layout for consumer products on company website through WordPress interface to enhance user experience and readability and increase the flow of incoming traffic to company website.

Projects

My Portfolio

Technical Scope: React.js, HTML, CSS, Adobe XD
Developed my portfolio in React.js using stateless
functional components throughout to ensure DRY
Principle; receives and renders appropriate data to screen
via class and id hierarchy.

Cryptography

Technical Scope: JavaScript, HTML, CSS
Established an advanced code and cipher system with asynchronous patterns of JavaScript that converts input into code; inspired by the book Code Girls, received positive feedback from the author.

Snowy Potter

Technical Scope: three.js, A-Frame, Glitch
Developed an Augmented Reality snowman in three.js
framework, A-Frame, entity-component-system (ECS)
architecture with container objects to envelop data
containers. Integrated Quick Response (QR) code.

CollegeVibes

Technical Scope: Storyboard, Axure
Conceptualized and developed a social media platform for
freshman students that fostered interaction and
relationship development across campus at Montclair
State University
